Diego Martinez

Full-Stack Engineer

786-443-9321 | diegommart2004@gmail.com | linkedin.com/in/diegomartinez30 | github.com/FastMartini | devpost.com/FastMartini

Education

Florida International University — Miami, FL
Bachelor of Science in Computer Science — Aug 2023 – Dec 2026

Technical Skills

- Languages: Python, TypeScript, JavaScript, Java, SQL, C, HTML, CSS
- Frontend: React, React Native, Vite, Expo, Chrome Extensions
- Backend & Databases: FastAPI, REST APIs, Node.js, PostgreSQL, SQLite, JDBC
- AI/ML: Gemini API, Google ADK, spaCy, Scikit-learn, Pandas, NumPy
- Tools & Cloud: Git, GitHub, Solana, Google Cloud Platform; AWS Certified Developer Associate (in progress)

Projects

MomentumX | React, TypeScript, Python, FastAPI, SQLite, Solana — Sep 2026
- Co-developed a tokenized stock trading simulator on Solana devnet; won **MLH Best Use of Solana** at ShellHacks 2026.
- Built React/TypeScript scanner interfaces, price charts, trade tickets, and dashboards connected to FastAPI endpoints.
- Implemented Python momentum scanning across 19 stocks using price changes, relative volume, and news catalysts.

Veritas Browser Extension | JavaScript, Python, FastAPI, spaCy, Gemini API — Aug 2025 – Apr 2026
- Developed a Chrome extension that analyzes article text for political framing and displays results in an interactive popup.
- Built FastAPI endpoints for article processing and structured JSON responses; integrated spaCy and Gemini for claim extraction, summaries, and confidence signals.

HaRi Agentic Onboarding Platform | React, Vite, FastAPI, Google ADK — Sep 2025
- Built a full-stack onboarding prototype for forms, document generation, payroll steps, and training guidance.
- Connected React workflows to FastAPI endpoints and Google ADK agent tool calls for onboarding tasks.

Membership Inference Attack Study | Python, Scikit-learn, Pandas, NumPy — Mar 2026 – Apr 2026
- Trained a TF-IDF/logistic regression text classifier and evaluated membership inference using confidence, loss, and entropy features.
- Measured attack performance with accuracy, precision, recall, F1, ROC-AUC, and ROC curves.

Experience

CodePath — Remote
Tech Fellow — Apr 2026 – Present
- Mentor 300+ students in Python, data structures, algorithms, debugging, and technical interview problem-solving.
- Facilitate collaborative code walkthroughs and mock interview practice, emphasizing clear technical communication.

FIU INIT IGNITE Program — Gulfstream Elementary School
Python Programming Instructor — Sep 22 – Dec 3, 2026
- Teach Python fundamentals to 15+ elementary school students through accessible explanations and hands-on coding exercises.
- Guide student debugging and problem-solving while adapting instruction to different learning needs.

Capstone Project (Veritas) — Miami, FL
Team Lead / Full-Stack Developer — Aug 2025 – Apr 2026
- Led a development team using Scrum, delegated tasks, and coordinated GitHub collaboration across frontend, backend, and AI workstreams.

Tropical Smoothie Cafe — Miami, FL
Crew Member — Jun 2023 – Present
- Maintain order accuracy and service quality in fast-paced shifts while coordinating with teammates and balancing college coursework.

FIUteach — Miami, FL
Teacher in Practice — Jan 2023 – Apr 2023
- Designed and delivered biology lessons to 30+ middle school students, adapting explanations and activities to support learning.
